RESERVOIR ALUMINIUM ACCESS COVERS

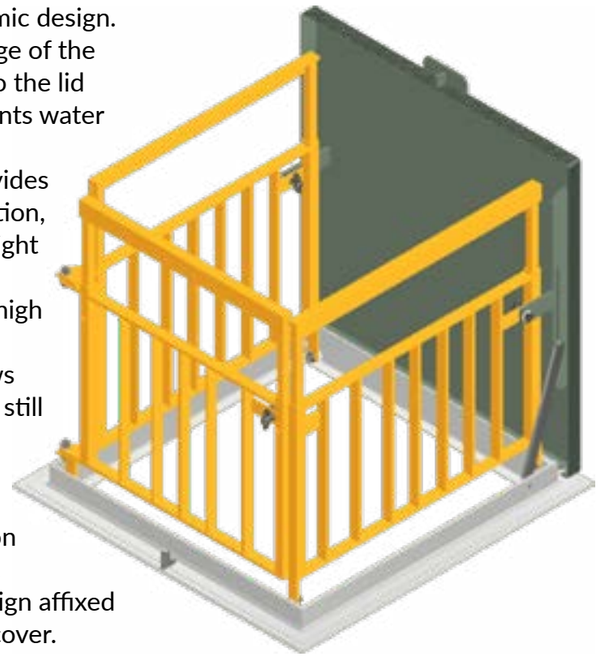
Safe, Innovative & Functional
Access Cover Solutions

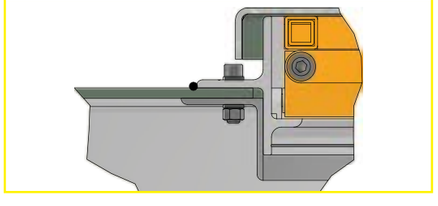
Reservoir Safety Access Covers

Austral International Safety Access Covers provide a highly functional solution for water and other authorities concerned about personnel safety when working around water reservoirs, tanks and other unprotected voids.

Developed with the ethos of "zero harm" the Austral Safety Cover is different from other covers in that it was developed specifically for safety while maintaining functionality. All features are targeted at issues often ignored in more general access cover design.

- Lightweight and ergonomic design.
- Raised lip around the edge of the frame and folded edge to the lid of the access cover pevents water ingress.
- Fold up safety grate provides four sided access protection, compliant to handrail height requirement of 900mm.
- Safety grates painted in high visibility "safety yellow".
- Safety grate design allows access to the void whilst still maintaining a four sided barricade.
- Full aluminium construction for corrosion resistance and longevity.
- Confined space danger sign affixed to underneath of hatch cover.





- The heavy-duty aluminium extrusion has a raised lip and low profile that is aesthetically pleasing, reduces trip hazards and allows the lid to fold over edge of frame to ensure a watertight cover . Cover protrudes only 80mm above coverslab/roof.

- Neoprene seal to underside of lid eliminates ingress of stormwater, insects etc.to the reservoir.
- Concealed continuous hinge provides greater security and helps prevent unauthorised access.
- Surface mount option available.

FSP Premium & TSP Series

All Austral Access Cover grates are designed in compliance with the Australian Standard AS 1657:2018 handrail height requirement of 900mm. For the smaller sized covers, a telescopic rail system is utilised to provide grates and gate at a safe working height.

FSP Premium Series
The FSP Series Premium Four Sided Austral Safety Cover is the ultimate in void protection; with its unique folding gate system the operator is never needlessly exposed to the open void.

TSP Series
The TSP Series Covers share a lot of the same features as the Premium Four Sided Cover and offer extremely good value for money, making them the ideal choice for industrial, commercial and smaller municipal applications.

FSP Premium Series Cover Stock Sizes

Model	Void Opening Size	Clear Opening Size	Lid & Grate Specification
FSP2013	2050mm x 1320mm	1800mm x 1200mm	Single Lid with Standard Folding Grate
FSP1690	1600mm x 900mm	1370mm x 778mm	Single Lid with Telescopic Folding Grate
FSP1410	1430mm x 1020mm	1200mm x 900mm	Single Lid with Telescopic Folding Grate
FSP1212	1200mm x 1200mm	1042mm x 1089mm	Single Lid with Standard Folding Grate

TSP Series Cover Stock Sizes

Model	Void Opening Size	Clear Opening Size	Lid & Grate Specification
TSP6060	600mm x 600mm	464mm x 504mm	Single Lid with Single Safety Grate
TSP9060	900mm x 600mm	724mm x 504mm	Single Lid with Dual Safety Grates
TSP1068	1076mm x 696mm	900mm x 600mm	Single Lid with Dual Safety Grates
TSP9090	900mm 900mm	724mm x 804mm	Single Lid with Dual Safety Grates
TSP1290	1200mm x 900mm	1004mm x 804mm	Single Lid with Dual Safety Grates
TSP1398	1396mm x 996mm	1200mm x 900mm	Single Lid with Dual Safety Grates
TSP1312	1396mm x 1296mm	1200mm x 1200mm	Single Lid with Dual Safety Grates
